A close-up portrait of a woman with long, dark, wavy hair and a black wide-brimmed hat. She is looking directly at the camera with a serious expression while holding a pair of black binoculars to her eyes. The background is blurred, suggesting an outdoor setting. The entire image is framed by a white border with a decorative top and bottom edge.

**Never stop searching**

# The search for perfection is never over

Life is a journey. We should never stand still.  
Never stop learning. Never stop experiencing new things.  
Never stop searching for the rare and the beautiful.

## A rare Tasmanian

We believe that some of the greatest things in life are yet to be discovered. That's why we matched traditional gin botanicals with a rare Tasmanian native spice to create a refined and elegant gin that is unlike any other.

Forty Spotted is hand distilled in small copper pot stills. We favour the steeping method of gin production and use the traditional botanicals of juniper berry, coriander and lemon peel to create a traditional London Dry style, but incorporate something a little bit special to give our gin its unique finish.

Forty Spotted Gin is available in:

700mL bottle

200mL bottle

40% alcohol by volume

To order, please visit our website

### *Tasting Notes*

**Colour:** Crystal clear.

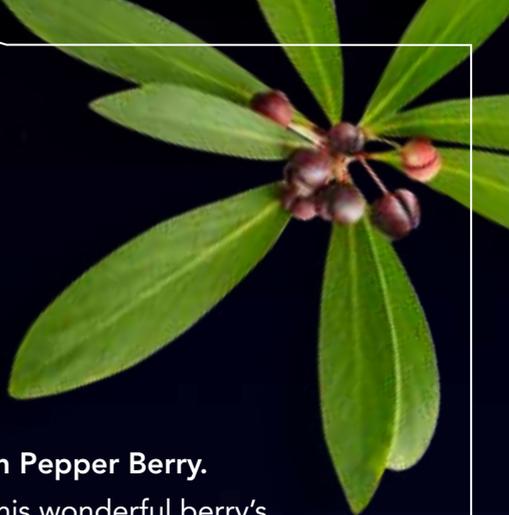

**Nose:** Highly aromatic, fresh grated pepper on a floral bed of herbs and spices underpinning the delightful juniper notes.

**Taste:** Rose petals and spicy juniper combined with a dry, clean and fresh spirit. Excitingly complex. A spirit to even enjoy on its own.

**Finish:** Lemon peel dryness, warming to a slightly sweet lingering note of complementary herbs and spices.

*Best paired with  
warm nights  
and fine friends.*

# The secret ingredient

Introducing the Tasmanian Mountain Pepper Berry.

Also known as *Tamannia aromatica*, this wonderful berry's distinctive essence imbues Forty Spotted with a unique spiciness, giving you an exceptionally rich and individual gin flavour.

The Aromatica's unusual characteristics appear in the gin without dominating the spirit, giving it a delightful zing.

## Spotted, yet hard to spot

The Tasmanian wilderness produces rare things. Perhaps the rarest of them all is the unique, exquisite creature known as the Forty-spotted pardalote.

Sometimes known as a Diamond Bird, *Pardalotus quadragintus* is rare – very rare. And it's found only in Tasmania.

We believe this makes it the perfect namesake for our RARE TASMANIAN gin.

Forty Spotted, 14 Davey St, Hobart, Tasmania 7000
